

**AMENDMENT TO THE CLAIMS**

- 1-5. (canceled)
6. (original) A method for protecting a human subject against systemic human parainfluenza virus (hPIV) infection comprising administering to the subject an effective immunizing amount of a composition comprising a Sendai virus and a pharmaceutically acceptable carrier.
7. (original) The method of claim 6 wherein said composition is administered to the upper respiratory tract.
8. (original) The method of claim 6 wherein said composition is administered in a form selected from the group consisting of a spray, one or more droplets and an aerosol.
9. (original) The method of claim 6 wherein said composition is administered to said subject by a means selected from the group consisting of intranasal administration, intravenous administration, intramuscular administration, subcutaneous administration, intradermal administration, and administration to mucous membranes.
10. (original) The method of claim 6 wherein said composition elicits an hPIV-1 specific immune response in the group of cells consisting of B-cells or T-cells (CD4+ and/or CD8+ T-cells), or a combination thereof.
11. (original) The method of claim 6 wherein said subject is a human.
12. (original) The method of claim 11 wherein said human is less than 10 years old.
13. (original) The method of claim 12 wherein said human is less than 5 years old.
14. (original) The method of claim 13 wherein said human is less than 1 year old.
15. (original) The method of claim 6 wherein said effective immunizing amount is between  $1 \times 10^5$  -  $1 \times 10^8$  plaque forming units (pfu).
16. (original) A method for enhancing the immune response of a subject previously infected with hPIV to a subsequent hPIV infection comprising administering to the subject an immunizing amount of a composition comprising a Sendai virus and a pharmaceutically acceptable carrier.
